Fruit Salad

You will need:

- 2 bananas, peeled, and cut into bite size pieces
- 1 cup fresh strawberries, sliced or 1 package (10 ounces) frozen sliced strawberries
- 1 cup fresh orange slices or 1 can (11 ounces) mandarin oranges, drained
- 1 cup apple, chopped

What to do:

1. Wash your hands and clean your cooking area.
2. Wash bananas, strawberries, oranges, and apples.
3. Peel bananas and oranges.
4. Cut all the fruit according to recipe.
5. Place fruit in a large bowl and mix.

Yield: 10 servings (1/2 cup each)

**High in Fiber &
Vitamin C**

Depending on age, children can help chop or mix fruit. Talk to children about the names, color, and number of pieces of each fruit.

Metacognition Skills

- Shorten feedback loops (boat, not cruise ship)
- Increase predictability (reduce variables)
- Fix mistakes fast & well
- Fluency \neq Understanding

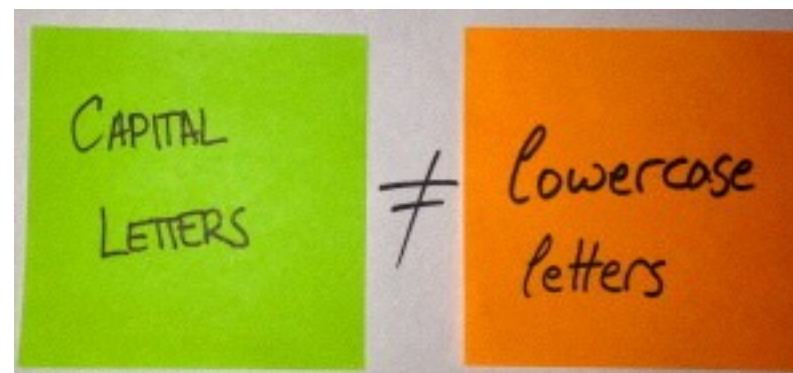

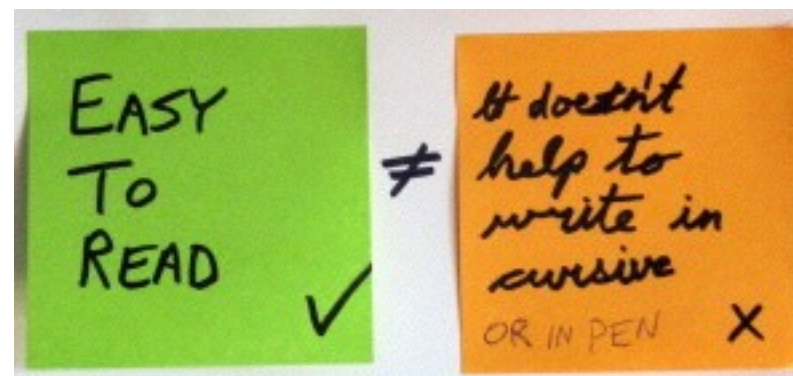

Way of the Mob

1. Listen first, speak second
2. Consider everyone's opinion
3. Create a safe space for others
4. Rather than spending time theorizing, try and see!
5. State the obvious - it might not be obvious to the person next to you!
6. Getting in front of everyone can be vulnerable, show respect, patience, and trust
7. Don't confuse navigation with backseat driving (avoid micromanaging!)
8. Respect the perspectives of people with less experience in a given area than you... they may show you new insights with their advantage of Beginner's Mind!

Some Things To Notice

- Something you learned about:
 - Syntax
 - The code/project
- What is something that hasn't been stated? What is a broad area that's not being considered or noticed?
- What would make the next exercise more effective?
- What are you feeling?

How To Use Post-Its
